February 22, 2005

I hate to tell you this, but Scientific American is not a peer reviewed scientific journal.

Here is the article :

<http://www.sciam.com/article.cfm?chanID=sa006&colID=1&articleID=000ED75C-D366-1212-8F3983414B7F0000>

William F. Ruddiman, Professor of Environmental Sciences, Retired, University of Virginia, effective Jan. 9, 2001.

No peer review, no reference, nada.

I didn't dismiss it, I destroyed it, with this :

<http://www.glaciology.gfy.ku.dk/papers/pdfs/197.pdf>

and this :

<http://www.geosci.unc.edu/faculty/rial/ESRreviewpaper.pdf>
