Bill, nobody else is reading this,
it's just you and me. That's how
the usenet works.

But you're learning fast, on
science newsgroups, we
use scholarly references,
and internet links to
scholarly references.
The newspaper articles
are usually just junk,
unless they directly
reference the article,
and supply a link to
the article.

If you want to post binary
images, post it on a binary
newsgroup, and then supply
us with the link to the binary,
or just post a link to the image.

For instance :

<http://cires.colorado.edu/events/lectures/zachos/>

<http://www.usssp-iodp.org/Education/DLS/calendar.html>

Go see a lecture, they're free,
and open to the public.
