just confimed, 4.7 magnetude

I went to school near Kent.

What do you mean "near Kent"? School wasn't very effective then ;o) You are either in a county or not in a county. It's like me writing my address as "Folkestone, Kent, Near Sussex, UK"

We had earthquakes several times per year.
Mostly in the 3-4 range.

We most certainly do not get several noticable quakes a year. This recent one is a once in 8 year event countrywide, not just Kent.

Unless your a colonial who is convinced the world is made up of the americas and a few assorted islands your post makes no sense at all.

Les

Folkestone, Kent

Folkestone, Kent

Are you saying the Brits have named an area of the UK after Kent County, Texas?

.
