Most china cities feel the earth quake  
All medias covered this

Technically, the earthquake covered the whole planet. A more technical description is available ...

<http://www.theaustralian.news.com.au/story/0,24897,23689563-601,00.html>

"The epicentre of the magnitude 7.8 earthquake was in Sichuan, striking 92km northwest of the provincial capital of Chengdu. It hit at 2.28pm (4.28pm AEST) when classes and offices were full"

:( My sympathy for the families of those who were killed.
