As I don't want David to do to this group  
what he's done to the  
Quaker, archaeology and fibromyalgia  
groups, I'll try to email you  
privately.  
...

For Doug –

I don't want you to do to SGM what you have done to  
archaeology,  
ancient history, quaker, environment, and global warming  
groups.

Re: Why tomorrow will be record warmth in New England

Your behaviour has been way out of bounds.

David Christainsen

Oh. Are you going to threaten to chase me out of your classroom as you have done to people on sci.archaeology? Really David, look at the beam before you complain about notes.

Meanwhile, exposing Inhofe's 400 scientists:<http://tinyurl.com/3butgq>

Doug– Hide quoted text –

In part because you are not a Christian, your use of biblical language is out of place on SGM.

The Bible has been quoted for centuries by many non–Christians. A non–Christian quoting the Bible does not minimize the impact of the inspiration of the words nor the power contained within. Your assessment here, as in so many cases with your Usenet assessments, is wrong.

Meanwhile, I anticipate a January Thaw in New England. I could be wrong because predicting weather is an art as well as a science. Do you agree?

You have no credentials in meteorology, therefore, you are unqualified to make a scientific, meteorological assessment of anything weather–related. You can guess, like the rest of us certainly, but in meteorological circles your guess holds no weight. Do you agree?
