This message is from a fellow who's been lost driving in some of the biggest cities in the world—Moscow, Sao Paulo, Caracas, etc. This summer, we will travel in a van through Western Europe for 4 months. Want to buy a handheld GPS around \$300US – prime reason is to navigate cities only. Prefer to wander in the countryside sometimes even getting "lost." Not really necessary for me to have all the bells and whistles, clocks, calculators, geocaching, altimeters, etc. Would rather have more memory for maps. Any ideas would sure help me out?

Thanks, Larry
