Now that is what I wanted to hear. 1.8GB of map data included tells me that is a complete version of City Select – wonder why the advertise this preloaded version as City Select 'NT' vs. just saying preloaded with City Select V6 or V7 or whatever it is?

Where did you get this info – from Garmin I'm assuming? Any indication if this huge 1.8GB database will ever be 'updateable' ... not likely unless it is patchable or selectvely overwriteable via special update software.

Quest 2 w/ 2gb of memory.... every closer to the perfect hand held unit. Add a replaceable battery, a geocache mode and we're there.
