The best you can do is to load something, either one small segment of a map or perhaps the marine POI database available at [http://www.garmin.com/support/download\\_details.jsp?id=941](http://www.garmin.com/support/download_details.jsp?id=941) (I am not sure that erases maps, but believe it does.)

Some older versions of MapSource would load an empty map set into the GPSR. If you want to experiment with them, get them at <http://www.gpsinformation.org/perry/agree.html>.
