Here is a link where you can find some info on it:

http://europa.eu.int/comm/dgs/energy_transport/galileo/index_en.htm

Propaganda works both ways. When you read some of the documents on the above site, you may notice subtle or blatant "anti-GPS propaganda."

To that I will note that GPS is up and running providing an awesome PNT system to the world and is undergoing improvements that will provide increased accuracy, robustness, etc. And the cost to our friends in the EU.....ZERO. Not one euro, franc, shilling, mark, pound, peso.....
