Does anyone know if there is a group for select models such as the Pioneer AVIC line? I know there is a lot of messages about the portable units (which I have too –Garmin) but have a question regarding the sub–display on my AVIC N3. Anyone out there have this unit or know of a good resource for it?

Thanks!

I have the AVICN2 with the up grade to N3. There is a group in UK on the Pioneer units but not much info the last time I checked several months ago.
