just wondering if anyone else experienced "trouble acquiring satellite" on Sunday afternoon, Feb. 11. I live in Southern Ontario Canada and was northbound around 1:00 pm est. and suddenly lost satellite reception. It was overcast at the time, but when I came home 2 1/2 hours later, it was partly sunny and still wouldn't connect. Later at around 6pm, I turned my Garmin c340 on and everything was great.

I was concerned that something might be wrong with the unit, but I drove around all day with it on at work today and it always worked.

Just wonderin'.

Bud

Recommend that you report your problem to the US Coast Guard Navigation Center at:

<http://www.navcen.uscg.gov/gps/gpsuserinput.htm>

If you provide your contact info they should be able to let you know if other users had similar issues.
