Yes, two years ago it was possible to get maps for the USA. I have some but they only work with the USA version of the tomtom.exe file. Today they have one version of the program that will work with either set of maps but this was not always the case. It is not my opinion but it is what I recall so I might be wrong I suppose since it is based on my memory.

You're quite correct. The OP would have to upgrade to v6.
