Greetings:

I hope someone here can help me with this.....

I just downloaded Google Earth and right away I have a problem: I cannot search for locations and "fly to" them.

Seems no matter what location I type in, I get YOUR SEARCH RETURNED NO RESULTS....

Not even for new york, ny!!!!

Oddly enough....I *can* find Beijing, China.

Is there some other "locations" module that I need to download?? I see no reference to anything like this. And when I searched the help area, it just confirmed that everything I'm doing *SHOULD* be working.

Assistance appreciated.

Thanks!!

just search for "New York". I'm not really happy with the latest rev of GE, at least as far as the tilt goes.

.
