Well that wasn't where I drew my conclusion – that was a 'For example'.

If the difference isn't just in my head then it isn't that \$B;W\$& (B can't be used wherever \$BA[\$& (B is used but rather that \$BA[\$& (B won't be used for much of the contexts where \$B;W\$& (B is used.

For example does the following look strange to lurking NSoJ ?

\$B;u9\$\$,\$:\$\$\$V\$sIU\$\$\$F\$\$\$k\$HA[\$\$\$^\$9\$,!# (B  
I think I have a lot of plaque build up.

- > *Again, any NSOJ comments on the \$B;W\$& (B/ \$BA[\$& (B differences, if any?*

I don't know if it counts – but Cindy called me an idiot.
