Not much doubt about merging these two.

dQ nQ,n (n) an outcast
nQ nQ,n (n) outcast

However I think the definition could use a little fine-tuning as it seems a little harsh at the moment. Maybe add "odd man out" or such.

It would probably be clearer if there were entries for a common expression that uses dQ . dQ kY< nQ,nkY< (exp) to shun; to reject; to exclude (from some activity); to send to Coventry

(Did "sent to Coventry" make it into other English speaking countries?)

WWWJDIC already has an example for dQ kY<
"jgÁ'nQ kW_ I was left out in the cold by everyone.

"dQ " 90,800
"nQ " 127,000
"nQ,n" 95,700

"dQ kY<" 480
"nQ kY<" 3,060
"nQ,nkY<" 361

"nQ kWf" 4,090
"nQ kW_" 207
.
