In between my busy schedule as an FBI agent working to
undermine critics
of
Wikipedia, the following question occurred to me as I paid
an undercover
visit to Kadoya and bought a secret soft drink called "Nuda",
katakanaized
as りゃう

How do I pronounce りゃう? Is it different from りゃう?

Maybe the same as "りゃ" of "りゃう"?
<http://store.yahoo.co.jp/beerzone/30281.html>

That is pronounced like English "do". To phrase my question another way,
what is the need for りゃ when we have りゃ and り already?

And what is the need for りゃ when we have りゃ and り already?

Or りゃ:

<http://www.city.hanyu.lg.jp/wakuwaku/meisan.html>

What about りゃう?
