Um... do you think this would have been better as private mail, since the OP seems to have given a valid email address? It's creepy enough that the OP posted these images on a public website and invited complete strangers to view them, without having further details published in this newsgroup....

Bluntly we don't know the original poster and (from a family friend) I know all too well that there are some over-controlling boyfriends/husbands out there. I just hope that the original poster doesn't fall into that category.

I couldn't resist looking at the calendars. They were from 2002 and 2003. You'd think that if something were going on it would have come to a head by now. If this guy isn't just jerking us around, I think this whole thing is exceedingly weird and, uh, fornicated up.
