Very little anime has Japanese subtitles including major theatrical releases. I make it a point of looking.

People keep saying that, which is odd because the last time I was in the Japan Bookshop out of around a dozen anime DVDs only one didn't have subtitles.

All my Miyazaki titles do. My 1990 LD boxed set does as well. Those are all the Japanese market DVDs and LDs that I own. I have watched the "Ah My Goddess" movie with Japanese subtitles, but I didn't own the disc so I don't know what edition it was.
