I decided to start a new thread because of all the spam this newsgroup has been getting.

I'm not sure how starting a new thread is supposed to improve the spam situation.

Here is the new format the readers suggested. What do you think?

haiYuu ó\* actor  
no n of,'s,the gerund – one  
ªÀ®ê,çü  
open parenthesis  
sanJyuu thirty  
ichi one  
[...]

An improvement in readability, thank you.

Now, if only you could explain \*why\* you're posting these automated deconstructionist thingies here at all, that would be a bigger improvement.

The purpose of the deconstruction is to help English readers of Japanese to understand what the prefix or suffix of a word is while they are reading it. RikaiChan is good but it fails to do this. It also fails to teach numbers.
