Well... what do you know?

Date: Wed, 17 Nov 2004 00:50:51 -0800

It didn't work.

And here is the beginning of my AUTOEXEC.BAT file:

```
@\BOOTWIZ\reinstal.com
@ECHO OFF
SET TMP=C:\TEMP
SET TEMP=%TMP%
SET PATH=C:\WINDOWS;C:\WINDOWS\COMMAND;"E:\DiskKeep\"
SET CAUSEWAY=NOVM
SET TZ=EST-10EDT
?E:\RAMDISK\XMSDSK.EXE 6000 Z: /C1 /T /Y
```

Oh, wait a minute... there is also an AUTOEXEC.WIN

I'd never noticed the damn thing. Rather sparse, too,
this is all there is to it:

```
SET windir=C:\WINDOWS
SET winbootdir=C:\WINDOWS
SET COMSPEC=C:\WINDOWS\COMMAND.COM
SET EUDIR=E:\EUPHORIA
SET PATH=C:\WINDOWS;E:\EUPHORIA\BIN;C:\WINDOWS\COMMAND;D:\E\UTILS
SET PROMPT=$p$g
SET TEMP=C:\WINDOWS\TEMP
SET TMP=C:\WINDOWS\TEMP
```

I have just added SET TZ=EST-10EDT

sci.lang: Failed :-(Re: PC clock

Bear with me once again. Side bets open.

See you soon again.
