I guess that's why there's no "501 Danish Verbs Fully Conjugated in All the Tenses" book! (Mostly they're useful for high school students, but Benjamin Hary took advantage of the format to say valuable and original things about Modern Hebrew verbs.)

Yeah, talk about charging full price for a book with all those empty spaces where the binyanim don't exist.

You could better say that of its predecessor "201 Hebrew Verbs Fully Conjugated in All the Tenses," which I also have a signed copy of — because the author was a professor (of Biblical Hebrew, of course) at City College whom my mother (Registrar's Office) knew. (I think I met him once when I was 12 or so.)
