Most mathematics publishers ask for camera-ready copy.  
And the task

[...]

for the editor is to read the initial version, assign  
reviewers to it and handle the process that follows.  
And also may state to the writer that the paper is not  
suitable for that publication, but that other  
publications might use it. In which case just switching  
the style sheets works perfectly well.

Mathematicians don't know which is the best journal for their  
particular work?

The subject matter of a paper may be suitable for quite a  
few journals. A journal for which a paper is otherwise  
suitable may turn it down because the editor decides that it  
isn't substantial enough.
