I'm surprised no one's mentioned the Slavic palatalizations. From Bernard Comrie's chapter "Slavonic Languages" in his (ed.) *The World's Major Languages*:

"Two main sets of sound changes separate Proto-Indo-European from Common Slavonic. [...] The second major set of sound changes is a series of palatalisations. By the first palatalisation, */g/, */k/, */x/ become, respectively, /Z/, /tS/, /S/ before original front vowels,

Are any examples given? I'm particularly interested in examples of */x/->/S/, preferably examples with Sanskrit cognates.

.
