Dear Colleagues,

When we released WinLexic: GUI to Microsoft® Glossaries, we have received a lot of suggestions to make another software, which can manage not only Microsoft glossaries, but any glossaries you have.

Recently we have released AnyLexic: Terminology Management Software for Freelance Translators and Translation Agencies to meet this demand.

AnyLexic is designed for easy and convenient management of terminology glossaries. With AnyLexic, you can create, edit and exchange dictionaries in a reliable and convenient way.

You can search terminology using shortcuts, from any document in any program. AnyLexic fully supports import and export in .CSV, .TXT, and .XLS formats, as well as Unicode.

You can download free 30-day evaluation of AnyLexic from

<http://www.anylexic.com/download.html>

Questions and suggestions about Anylexic are always welcome at [support@xxxxxxxxxxxxx](mailto:support@xxxxxxxxxxxxx)

Best regards,  
Vladimir.
