When you have proved an ancient artifact to be an annual ledger. Then as the last you expect to be delayed in the recognition of your feat by slow-witted folks, who incorrectly put demands on you, as to solve the inner meaning(lessness) of the Latin alphabeth by the same token.

For instance: How come those three strokes of the letter alpha, or omega? Tell us are they zodiacical related?.etc.

My answer: The 46 different signs in this ledger named 'The Phaistos disc' are meant primarily as a decorative differentiation, to be counted upon.
