: Peter Olcott wrote:
: The Halt function would merely ask the
: UTM whether or not its specifically indicated final state has any
: state transition defined. This information is very easy for the UTM
: to provide, it merely looks up the action associated with the state
: in its state transition matrix table. "

Will Twentyman <wtwentyman@read.my.sig> writes:

: What if Halt is not running on a UTM?

Then the request for the information will simply FAIL, of course!
Don't you know ANYthing? I swear, y'all should be truly grateful
that I The Great Peter Olcott will so patiently spend so much of
my time and energy educating so many of you tuition-free.
