Should have been said /above/ to avoid my question.

OK. But, where did you get the idea that I was making that argument? Perhaps you jumped in unprepared by not reading the previous posts that put my statements in context:

"[Tony groups] all who notice the scientific discoveries regarding the statistical improbability of our Universe as Creationism adherents."

sci.logic: Re: and who made god?

Maybe so. Perhaps you can clarify how your statement(s) above addressed my statement in context, i.e. anyone who notices what science has said about the improbability of our Universe is a Creationism adherent.

>>>*The fact that this discussion*
>>>*is occurring at all drastically constrains the sort of universe in which it*
>>>*occurs.*

> *It didn't, obviously.*

Then you have constructed an ambiguous sentence above: "The fact that this discussion is occurring at all drastically constrains the sort of universe in which it occurs."

Perhaps you meant to say: "The fact that this discussion is occurring at all, drastically constrains /the discussion concerning the sort of universe in which we exist/."

And I assume that you will do likewise.

So far, so good.

> *So any argument that the fact that the universe appears fine-tuned*

I never claimed that appearances actually mean anything more. I assume that your phrase 'actually means' is synonymous with 'is

Re: and who made god?

proof.'

Note the context of my statements:

Albert wrote:

There is no "theory of 'intelligent design'" and nothing can be disproved concerning the idea of 'intelligent design', certainly not by 'very simple arguments.'

Tony wrote:

it is NOT science, nor in any way, scientific---

Albert wrote:

Yet, it is /reasonable/ to view the evidence for 'intelligent design' and make the statement that perhaps it is true.

- >
> *Let me put it in terms of conditional probabilities: Let's posit that the probability of the existence of our sort of universe is very close to 0. But, the probability of its existence GIVEN THAT we are in fact here is 1.*

OK. But I think you are arguing with yourself, in that I never claimed otherwise.

> I find myself in -- fits me rather neatly, doesn't it? ... must have been
> made to have me in it."*

Cute. But Douglas Adams, although entertaining, does not, in this quote, address the issue either.

In summary, what you should have been replying to way *my* point:

It is /reasonable/ to view the evidence (there is no proof) for 'intelligent design', specifically the /appearance/ of 'fine tuning', and make the statement that perhaps it is true. And furthermore, such a statement does not in any way place one in the category of creationism adherent.
