you say

He is not using the axioms of P in his argument. He is talking about them and the properties that they have.

i say
sorry

That's okay. I don't mind taking all this trouble to help you. It may pay off eventually. :)

he states he is employing /using P in his proof
so what is he employing from PM

I told you what he was saying. You'll have to go and read it again and make some effort to understand. Let me know if you need any further help.
