[snip]

Most of my articles presented here are taken from work in progress toward my PhD at UCC. Relevant topics and concerns for authorship include the ontology of objects generally, mathematical and logical systems, frameworks, matrices; more specifically Godel and totality, sets, etc. Elsewhere I have written on transcendental philosophy, Kant, Wittgenstein, and the nature of logic. All of my writings are delivered non-formally or in 'natural language', taking a philosophical perspective.

I feel badly for the faculty at UCC who have to put up with you.

Anyway, ask your thesis advisor (or consult the Chicago Manual of Style, or any similar reference) about the status of posts to a newsgroup, and I'm sure you'll find that they're nothing that anyone else is obliged to reference and give you credit for. Your posts are not "original articles." Posting to a Google Group or Usenet Group DOES NOT -- I repeat, DOES NOT -- constitute publication. Posting to a newsgroup is the Internet equivalent of having a discussion in a coffee shop or a bar. And that's nothing that anyone has to reference.
