Objects don't have properties of truth and falsehood.

They do IN LOGIC, DUMBASS.

No they don't. Objects don't have properties of truth and falsehood.
Truth and falsehood are functions not of objects but on the frameworks
within which objects are presented.

I said *IN LOGIC*, DUMBASS.
THAT IMPLIES that THESE objects ARE being presented IN A FRAMEWORK
OF LOGIC, THAT DOES impute truth and falsity TO THEM, TO THE OBJECTS.
Obviously, if we were in a different framework, then we would be
dealing with
DIFFERENT objects.
