CONFERENCE PROGRAMME:

The aim of the conference is to bring together interested researchers from AI and OR, and to give them the opportunity to show how the integration of techniques from AI and OR can lead to interesting results on large scale and complex problems. A secondary aim of CP-AI-OR is to provide an opportunity for researchers in one area to learn about techniques in others.

>>From almost 100 submitted papers, 26 papers have been selected to be presented in the main program.

For details, please see <http://cpaior05.mff.cuni.cz/program.html>

MASTER CLASS:

As in previous years CPAIOR'05, a major forum on the Integration of OR

and AI techniques in CP, will be preceded by a one-day Master Class where leading researchers give introductory and overview talks in a given area. This year, the topic of the Master Class is Metaheuristics and Constraint Programming. The Master Class is intended for PhD students, researchers, and practitioners. A basic knowledge of Constraint Programming will be expected of participants.

For details, please see http://cpaior05.mff.cuni.cz/master_class.html
