No, "my" four1 with the above gives

```
10.000000
14.000000
-2.000000
0.000000
-4.000000
-4.000000
0.000000
-2.000000
```

Would you post "your" four1? Or, email it?

/* #includes and definition of four1 excluded for brevity*/
