L> I don't know what MuPAD is

MuPAD is a commercial computer algebra system developed by the MuPAD group and distributed by SciFace GmbH

<http://www.mupad.de>

<http://www.sciface.com>

As far as I know, SciFace has special, low prices for students.

L> I'm going to download maple this afternoon

This would be a bit difficult because there is no trial Maple 9.5.2 version. Why, you could ask me?

Read the Maple Review coming in a week, and you'll understand why.

L> (assuming that it's free

L> and that there's a linux version).

A great idea of yours!

Given the amount of bugs in Maple, a tiny fraction of them at

<http://maple.bug-list.org>

after version Maple 8, Maple possibly should be distributed for free, compensation proportional to the users damage, wasted time and shot nerves.

;~)

Best wishes,
