Dear MfFaI,

Thanks for the reply. Although I'm impressed with your helpfulness and your zeal for maths, I must decline your kind offer (to post my math homework here for your/general assistance). It just wouldn't be cricket. (Although I am an American, two of my math books are from the UK, and I think it has had an effect (aside from graying my hair).
<g>

I had thought that, when I asked Dr. Fateman if he was good at algebra and first year physics before I'd let him have a go at my homework, it would have been clear that I was kidding. In the future, I'll try to make my whimsy more obvious. Or --- here's a thought! --- omit it all together. <g>

Best holiday regards (to all)!

Cordially,
Richard Kanarek
