I'm really puzzled by your classification of numerical software.
I would have put it in the truly challenging category!?

-- David

Numerical software? What kind of numerical software you are talking about?

Maybe it would be interesting to know your definition of "numerical software"...

Yes. We have the same question!

Jaap Spies

Re: complexity of numerical software

'Jaap' is pronounced (in Dutch) as 'ya' from 'yard' followed by a 'p' from 'cap' (phonetic: ja.p).

'Spies' sounds like an 's' followed by the word 'peace' (spi:s).

.
