I tried to enter this as a bug report at mupad's bugzilla thingy, but it wouldn't go.

I can't comment on the bug right now (but will forward it to someone in charge), but we haven't been using Bugzilla for quite a while now. Please discard old bookmarks you may have and go to www.mupad.de/bugs.html instead. If that doesn't work either, please mail me at ccr@xxxxxxxx or the address above.

Regards,
Christopher
