I thought everyone was bored this weekend...

But do not make generalizations.
If you are not interested in one thread, simply
do not participate in.
Otherwise, make your own forum, where you could be
the moderator of it and "cut" what posts...make you bored!

wow!

For someone who seems smart in math, you did not even see the sense of humor
in that statement that "every one seems to be bored"?

Amazing.

Sorry you feel I insulted you by even suggesting you might be bored.

It was tongue in cheek statement, you do not get it? what is the big deal
any way?

You skipped the whole topic only to take time for this silly childish reply?
You must be really bored then :)

Nasser
