<snip vaporius delusions>

Credits of JS:

"Jack has been working on the post-quantum physics of consciousness and the paranormal since he directed the famous Esalen Seminars in 1976 described by Gary Zukav in "The Dancing Wu Li Masters." He is also working on the connection of the warp drive physics of flying saucers to the new cosmology observations of anti-gravity "dark energy." "

"Oddly enough I was contacted by I.J. Good in 1980 because a paper I had published in Psychoenergetic Systems on such an entity was almost identical including a reference to New Age Death Cults in an obscure talk he had given in Chicago before some paranormal group. This was in the wake of the Jonestown mass murder. I had never seen or read or even heard of his talk of course. Hence, it appears that we were both channeling the same information from what Jorge Luis Borges simply called "The Author".

Therefore, Jack is a paranormal channeler of warp-drive physics of flying saucers.
