Hi, folks!

I would like to present you one cryptograph (kind of alphametics).  
It's Croatian, and I believe world record – three terms with 12  
letters.

P I S M O S I S T O K A ("Letter from east" – title of novel)

P R O K R S T A R I T I (to cruise)

S T A R O K A T O L I K (Old Catholic)

Code: 7,0,8,2,4,9,3 – 9,5,6,1,3 gives additional term.

Solution: Tropska klima – tropical climate (T=7, R=0, etc.)

2 6 4 1 8 4 6 4 7 8 9 3

2 0 8 9 0 4 7 3 0 6 7 6

4 7 3 0 8 9 3 7 8 5 6 9

Can you make a work with three 13–letters terms?

Cheers!

Zoran Radisavljevic

Novi Sad, Serbia

P.S. Task is really hard and I'll understand if it's beyond your  
power. I hope that somebody can send me few works on English with  
length 9–10. Thanks in advance.
