Sorry for the double postings Winter, I'm posting through google, and it seems to be happening quite a lot since they introduced the beta of the new version. Some posts seem to get lost too. It is not my intention to flood. As for the nasty style, well you can't please everybody all of the time, Winter. I'm sorry for any distress it may cause to you personally, since you are not among those I dislike or intend to be uncivil to. I find empty minded prattling of the kind the OP can't seem to quit posting, as annoying as others find my style.
Regards
