Mr. Harris,

I would certainly agree with the fact that there is some sort of storm occurring in your brain.

I can't be sure that it will ever generate anything of value and thus far I'm batting 100 %!

Since you've gotten so bored with the SUperCala Fragelous, how about working the already factored RSA number.

Heck, it should be easy right?

You even know the factors, why not see if you can work backwards and then claim, see told you so?

What's wrong, afraid it doesn't work, or more pointedly, you ALREADY KNOW it doesn't work.

Tried some examples didn't you and now know just how outrageous you've been these past weeks.

I agree with you that we may be in for difficult times given that people like you are allowed to get a degree at a relatively know school.

This, indeed, could be the end of us all!

.
