Not to defend the silly poser, but seems to me that he used the word correctly here (never mind the spelling).

Consummate \Con"sum*mate\ (k[o^]n"s[u^]m*m[=a]t or k[o^]n*s[u^]m"m[=a]t; 277), v. t. [imp. & p. p. Consummated (k[o^]n"s[u^]m*m[=a]`t[e^]d); p. pr. & vb. n. Consummating (k[o^]n"s[u^]m*m[=a]`t[i^]ng).]

To bring to completion; to raise to the highest point or degree; to complete; to finish; to perfect; to achieve.
[1913 Webster]

(I won't defend his earlier use regarding consummating discussions with various "affectionados".)
