-

Anybody take a look at:

<http://jobsearch.usajobs.opm.gov/getjob.asp?JobID=28543205&AVSDM=2005%2D06%2D12+19%3A47%3A14&L>

It's a job for operations research/mathematician with the army. Is anybody familiar with the level of knowledge required to be successful at such a job, and what type of knowledge they want?

.
