LOL, understood. To modify a quote from Lincoln, reforming cranks is like shoveling fleas in a barn. Despite how pointless it may seem, other students of mathematics may read it and the arguments may be helpful in dispelling logic errors. Besides, Tony's errors remind me of similar ones "Nathan the Great" used to make.

As for JSH, is he truly gone? He has left many time before, only to return a refreshed crank, spewing new fantasies.

Regards,

Jonathan
