International MultiConference of Engineers and Computer Scientists 2006

IMECS 2006

20-22 June, 2006, Hong Kong

<http://www.iaeng.org/IMECS2006>

The International MultiConference of Engineers and Computer Scientists 2006 will take place in Hong Kong, 20-22 June, 2006. The IMECS 2006 is organized by the International Association of Engineers (IAENG). The conference has the focus on the frontier topics in the theoretical and applied engineering and computer science subjects.

The IMECS 2006 consists of 14 workshops (see the details at IMECS website: www.iaeng.org/IMECS2006). The multiconference serves as good platforms for the engineering community members of different disciplines to meet with each other and to exchange ideas. The current conference committee of the IMECS 2006 includes over 150 workshop co-chairs and committee members of mainly research center heads, department heads, professors, and research scientists from over 20 countries, while a few of the committee members are also experienced software development directors and engineers.

All submitted papers will be under peer review and accepted papers will be published in the conference proceeding (ISBN: 988-98671-3-3). The abstracts will be indexed and available at major academic databases. The Technology Research Databases (TRD) of CSA (Cambridge Scientific Abstracts), DBLP and Computer Science Bibliographies have promised to index the print proceeding in advance of its publication. And after the publication of the proceeding, print copies will also be sent to

databases like IEE INSPEC, Engineering Index (EI) and ISI Thomson Scientific for indexing. The accepted papers will also be considered for publication in the special issues of the journal Engineering Letters. Some participants may also be invited to submit extended version of their conference papers for considering as book chapters (soon after the conference).

The following workshops are held as parts of the IMECS 2006:

IWAIA'06

The 2006 IAENG International Workshop on Artificial In
