I have certainly learned a large number of new words by reading this
post— wonder what they mean? Here's my list.....

QUNATIUM Infinte Fundametal INSTANIOUS NERUAL simultationle
QUNATATIVE pyramind THEROY ect. defintions

I also learned quite a large number of ways to mangle the English
language. I guess it was in English. I suggest that the writer himself
would do well to consult a dictionary.....

EVERYTHING, AND THAT is the quantum address of everything that is inside and outside our universe. By a magnetic field. Outside and inside of all that is contained there in. Finding the laws of all quantum physics and all-matter and everything that can be changed and from adjusting the frequency of that matter and space time, speed of light, magnetics, gravity ect. Searching for the one law of infinite dynamics. Picture the laws as a dotted circle (pyramid program)and everything that can happen in that universe is because of knowing the All laws in that universe.

REPLACE word INFINITE on the internet WITH CALCULABLE NOW INCALCULABLE IS NOW CALCULABLE!!! in ll forms of INCALCULABLE replace with INFINITE then with A.I now it's CALCULABLE!

run the internet in infinite order then over again with wordlist new definitions! with <http://www.hyperdictionary.com/>
