To Subscribe

Email: Active_Mathematica-subscribe@xxxxxxxxxxxxxxx

This egroup is a new Mathematica users egroup formed to replace the inactive owner one at Yahoo.

The points of interest will be:

- 1) mathematics
- 2) fractals
- 3) surfaces (minimal, Calabi–Yau, null Ricci and constant curvature, etc.)
- 4) number theory
- 5) differential equations (fractional and partial, etc.)

More or less anything you can think of to use

Mathematica to program.

We will be independent of the Wolfram company.

I'm looking for a few good moderators.

We also need to upload good sample files

in all these areas and any others you like and are interested in.

Respectfully, Roger L. Bagula
