Hope no more: you ARE mistaken.

The proof has been sent . Whether it is flawless or not , it all depends on Jay to verify it now .

Flawed, as expected. :-)

I have e-mailed the refutation.

I'm shocked! A flawed proof of FLT by a math fan BUT NOT a mathematician, who also loves to gossip about how REAL mathematicians behave/research/work?? Nooooooo....really???!?! That hardly happens....what, some 4-5 times ONLY in the last 3-4 months and ONLY in the NG??

Anyway, when I wrote "hope no more...etc." I was in fact referring to Bassam, not to Jiahao...

Tonio

Pd. BTW, it seems to have been a rather gross flaw and in the first page, uh? I mean, from what I read....I haven't seen the paper, though.
