Hi

Any information about Wiles performance in  
Mathematics when he was in School

I have the feeling there must be an interesting  
stories about his early talent like Guss, Galois, and  
others...

My Regards  
B.Karzeddin

From all my knowledge of mathematical history , I  
know that Wiles like  
may others ( and me too ) , had a passion for  
mathematics . He loved  
to solve problems and one day while at the library he  
chanced upon "The  
Last Problem" By E.T Bell and saw Fermat's Last  
Theorem and dreamt he  
would shock the world...  
And yes I forgot , on whether Wiles had any flawed  
proof anot , I 'm  
not so sure , but the possiblity of him getting a  
flawed proof should  
be around 50% ... ( no offence or anything )+

Re: Proof Attempt For Fermat's Last Theorem

What I really mean, for example Gauss new a formula to sum the numbers when he was school boy (unless I'm mistakin, correct me please) and others may be had shown their early talent from very early childhood, and of course their school performance in maths. mainly indicant their early talents.

So, I'm certain that is also happened with Wiles, but we don't know or others who know may be gladly adding to our modest knowledge.

Thanking you in advance

My Regards  
B.Karzeddin
