I'm getting rid of a number of math texts that I acquired during my studies. If you're interested in any of them or have any questions, email me at mathbooksale@xxxxxxxxxx I'll accept any reasonable offer. All books are in very good condition. I'm located in London, Ontario. I'm willing to ship out the books at the buyer's expense. Otherwise, you can arrange to come pick them up. I need to get rid of these ASAP – whichever books haven't been sold after a month will be donated to a local library.

Mathematical Logic
Joseph R. Shoenfield

The Elements of Real Analysis
Robert G. Bartle

Introduction to Real Variable Theory
S. C. Saxena & S. M. Shah

Theory of Relativity
W. Pauli

Probability Theory: An Introductory Course
Yakov G. Sinai

Calculus
Robert T. Smith & Roland B. Minton

Single Variable Calculus: Concepts, Applications, Theory
Stanley O. Kochman

College Geometry
Leslie H. Miller

Elementary General Topology
Theral O. Moore

An Introduction To Harmonic Analysis
Yitzhak Katznelson

Several Math Books For Sale

Principles of Mathematical Analysis
Walter Rudin

Complex Variables
Herb Silverman
